

Day 01 ECE497 32-bit Embedded Linux

Or
How to make your students sit up and beg

By
Mark A. Yoder
Rose-Hulman Institute of Technology

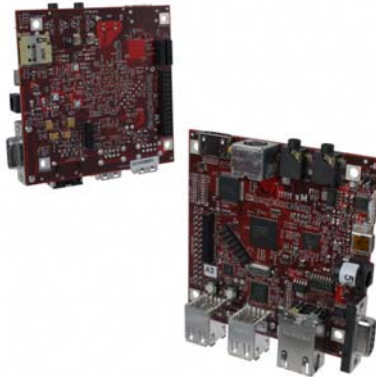

The Details

To understand a system one must first understand its parts.

--Chris Hallinan, Embedded Linux Primer

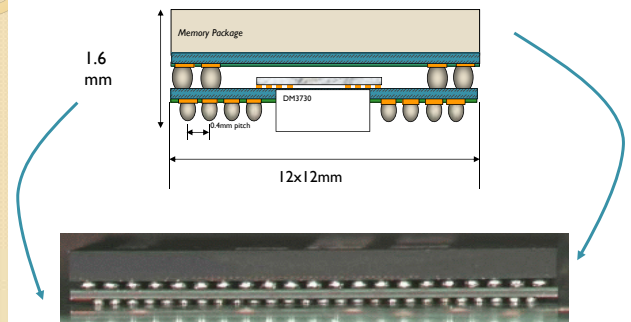

What's in the Beagle?

- Hardware

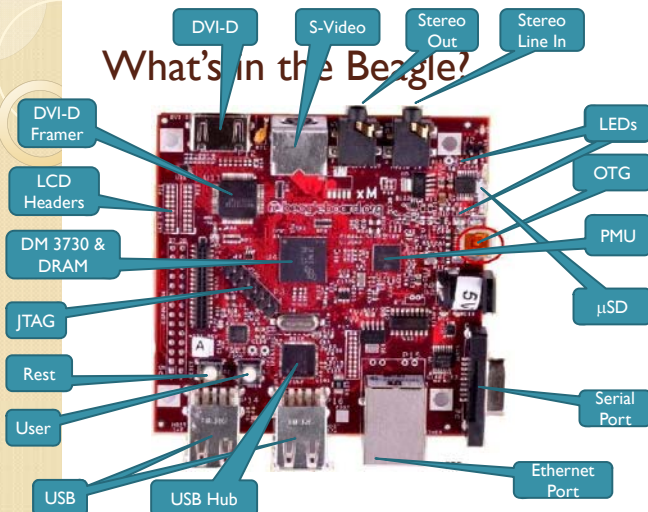

DM3750 POP Memory

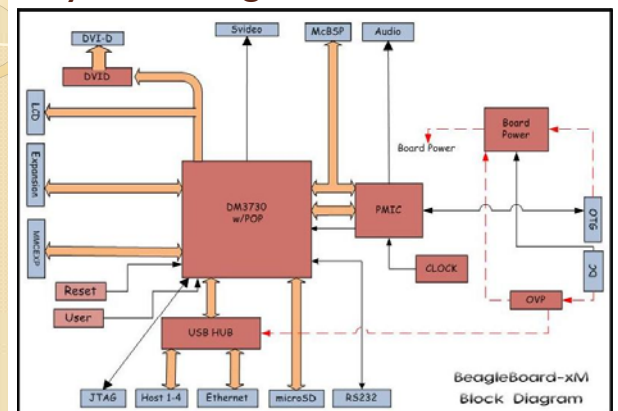

- POP = Package on Package Technology

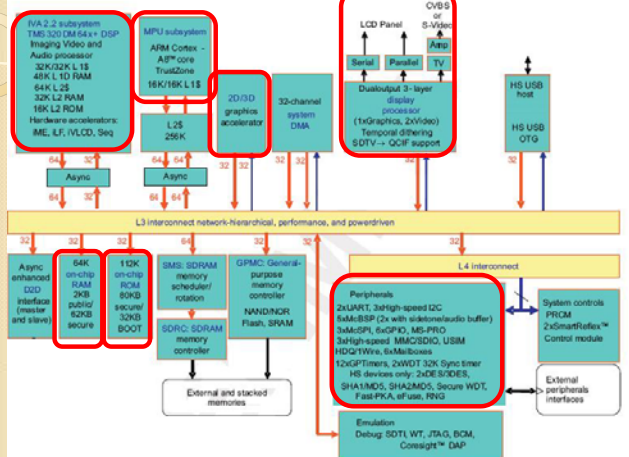

What's in the Beagle?

- 1 Introduction
- 2 Your First Embedded Experience
- 3 Processor Basics
- 4 The Linux Kernel
- 5 Kernel Initialization
- 6 System Initialization
- 7 Bootloaders
- 8 Device Driver Basics
- 9 File Systems
- 10 MTD Subsystem

- 11 BusyBox
- 12 Embedded Development Environment
- 13 Development Tools
- 14 Kernel Debugging Techniques
- 15 Debugging Embedded Linux
- 16 Porting Linux
- 17 Linux and Real Time
